

Infection Control Area Manager

VHQC is a healthcare consulting firm and the federally designated Quality Improvement Organization for Virginia. For 25 years, we have been leading the way to better healthcare for providers and other clients by offering expertise in quality improvement, EHR implementation consulting, utilization management and analytic services that support improved patient outcomes – and often, cost savings.

As an Area Manager for the nation's largest health quality initiative, you will provide one-on-one consultation across multiple settings of care and on topics that range from infection control to pressure ulcer prevention and flu immunization. You will apply the latest quality improvement tools and techniques, enjoy a predictable schedule and have the freedom to work from home, while being part of the most experienced and respected healthcare quality improvement organization in Virginia.

Applicants must demonstrate the ability to work independently, manage multiple priorities, and design and implement improvement plans of action. Subject matter expertise in infection control and quality improvement required.

Requirements:

Registered nurse with current VA license and certification in infection control required. Master's degree preferred.

Minimum of 3 to 5 years as a health-related infection control practitioner required. Project management and quality improvement experience preferred. Ability to travel between healthcare providers including hospitals, nursing homes, physician office or other healthcare settings.

Competitive salary and benefit package. Benefit information available at www.vhqc.org under the Careers/How You Benefit/VHQC Benefits Summary section. E-mail resume with cover letter and salary requirements to VHQC at hr@vhqc.org. EOE.
